NATIONAL HEALTH EDUCATION COMMITTEE, INC.

135 EAST FORTY-SECOND STREET, NEW YORK 17, NEW YORK • YUKON 6-7110

June 1, 1964

Representative John E. Fogarty
House Office Building
Washington 25, D. C.

Dear John:

I thought you would be interested in seeing the 1964 edition of our brochure "Does Medical Research Pay Off In Lives And Dollars?" It is a pictorial presentation pointing up the importance of Federal, as well as state and local government, business and private support of medical research.

The brochure illustrates some of the resulting breakthroughs and what these pay-offs have meant to all of us in lives saved and prolonged, disabilities prevented, and major economic benefits of real meaning to every citizen.

The answers to our remaining major health problems in the U.S. - improved treatments, cures and methods of prevention for cancer, arteriosclerosis (the main cause of heart attacks and strokes), mental illnesses and the other leading killers and cripples - depend on our research investment now.

Won't you send me any comments you may have and urge increased expenditures for research and training on all levels - local, state, and federal, from all sources, private and public?

With warm good wishes,

Cordially yours,

Mrs. Albert D. Lasker
Chairman
